Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicants' response to the Office's Restriction (mailed on or about 18 November 2003 has been duly noted. The Restriction appearing to be proper and further in view of Applicants' response thereto, the Restriction is hereby **made Final**. Applicants therefore are required to cancel all nonelected claims or show cause, if they able, through appropriate means, why the non-elected claims should not be cancelled.

An Office Action on the merits of Claims 9-12 follows.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Togami et al (Pat No. 5,855,059; hereinafter Togami).

Togami teaches a means of surface mounting electronic components wherein a carriage assembly has a pair of mounting heads mounted on opposite sides of a carriage assembly. Each mounter head is adapted to pick up components from a respective feeder station parts supply member... Widths of guide member or transfer rails can be changed according to the size of the (Cf Col 3).A mounting head located on one side of the Pcb picks up an electronic part (Cf Col 2), holds, transfer and mounts the same without interfering with a second mounting head located away from the first mounting head.(Cf. Col 5). Togami also teaches holding the first mounting head at a

first position while a second mounting head mounts electronic parts onto the substrate (Cf. Col 3).

Claims 10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
